Profile Summary

Python Full Stack Developer with more than 1 year of experience owning web applications end-to-end, from UI design and frontend implementation to backend development using Python, Django, and MySQL. Comfortable diagnosing and fixing production issues while maintaining a focus on clean, efficient code.

Skills

Languages: Python, SQL, JavaScript, HTML, CSS

Frameworks & Libraries: Django, Django REST Framework (DRF), Flask, Bootstrap

Databases & ORM: MySQL, SQLite, PostgreSQL, Django ORM

Backend Technologies: REST APIs, Redis, Celery

Tools & Platforms: Git, GitHub, Docker, Postman, Netlify, AWS

Concepts: SDLC, Agile Methodology

Education

Yenepoya University (Online)

2026 – Expected 2029

Bachelor of Computer Applications (BCA)

Indira Gandhi Polytechnic College, Mahe

2020 – 2023

Diploma in Computer Engineering

Percentage: 81%

Govt. Vocational Higher Secondary School, Vadakara

2018 – 2020

Higher Secondary Education

Work Experience

Softverses IT Solutions.

Jun-2025 - Present

Jr Python Full Stack Developer

- Owned **end-to-end development** of **18+ client projects**, from **custom UI design** and **frontend implementation** to **backend development** using **Python**, **Django**, and **MySQL**.
- Implemented **user authentication** and **role-based access control** across deployed applications, improving application security and access management.
- Designed and implemented **responsive frontend interfaces** independently, translating client requirements into production-ready applications.
- Diagnosed and resolved issues directly in the **production environment**, ensuring application reliability and continuity after deployment.

Quest Innovative Solutions Pvt. Ltd.

July-2024 - Jan-2025

Python Full Stack Developer Intern

Calicut

- Contributed to web application development using **Python**, **Django**, and **MySQL** under senior developer guidance.
- Developed **RESTful APIs** using **Django REST Framework (DRF)** and used **Git/GitHub** for version control.

Projects

TeamFlow: Project Management | Django, Django REST Framework, MySQL, Redis, Celery, Docker

GitHub

- Built a **project management REST API** using **Django REST Framework** with organizations, projects, tasks, team members, and comments.
- Implemented **JWT authentication** and **role-based access control** for system, organization, project, and team-level permissions.
- Implemented **Redis cache-aside caching** with filter-aware cache keys, TTL-based expiration, and explicit cache invalidation for data consistency.
- Implemented **Celery** for asynchronous task-assignment email notifications and background task processing.
- Containerized the application using **Docker** with a shared application image and **multi-service Docker Compose** setup for Django, Celery, Redis, and MySQL.

Trusted and Secure Medical Records: Clinical Management System | Flask (Python), Blockchain, MySQL

- Developed a decentralized medical record system using **Hyperledger Fabric** and **IPFS** for secure storage.
- Built backend with **Flask** and **MySQL**, and frontend with **HTML**, **CSS**, and **JavaScript**.
- Achieved scalable, secure, and efficient storage with reduced overhead.

Rentify: Product Rental Platform | Django, Bootstrap, SQLite, HTML, CSS, JavaScript [GitHub](#) [Live](#)

- Developed a **multi-user rental system** with **secure authentication**, **real-time inventory management**, and automated product status tracking to prevent overbooking.
- Built a **responsive UI** with Bootstrap and deployed the app on **AWS Elastic Beanstalk**, handling environment configuration, static files, and production setup.
